

SOLAR WISE™

FLO-SAFE NATURAL INSULATION

A well insulated home not only helps to keep your family cooler in summer and warmer in winter, but can actually reduce your power bills through more efficient usage of heating and cooling systems.

What is Flo-Safe?

Solarwise Flo-Safe is a 'loose-fill' insulation material manufactured from shredded, recycled paper. It works by trapping millions of tiny air cells within its fibres and therefore acts as a physical barrier to reduce the flow of heat.

Easy, Quick Installation

As a 'loose-fill' material, Flo-Safe is pumped into every part of your roof – including tight corners – thereby providing effective coverage. It can be installed in as little as two hours and is the perfect insulation for homes or commercial premises with low pitched roofs.

When pumped in to a depth of 100mm (between the joists in a ceiling) the product achieves a top thermal rating of R2.5.

Fire Resistant

Solarwise Flo-Safe is completely fire resistant and in some cases will actually protect your home against fire. Because the material will char, rather than flame, fire will not readily penetrate through the ceiling of a room which has been insulated with Flo-Safe.

Vermin, Insect and Mildew Resistant

Natural salts and minerals have been added to Flo-Safe to ensure the material is vermin and insect proof. It will also inhibit mould growth.

Product Guarantee

At Solarwise, we manufacture Flo-Safe to Australian Standard 2462 and guarantee the product for the life of your home.

Features and Benefits

- Keeps your home cooler in summer
- Significantly reduces heat loss during winter
- Provides acoustic insulating properties
- Reduces heating and cooling costs by up to 50% (and in turn lowers greenhouse gas emissions)
- Uses recycled material
- Fire-resistant
- Vermin and mildew resistant
- Non-hazardous
- Guaranteed for the life of your home.
